FRETBOARD NAVIGATION GUIDEBOOK

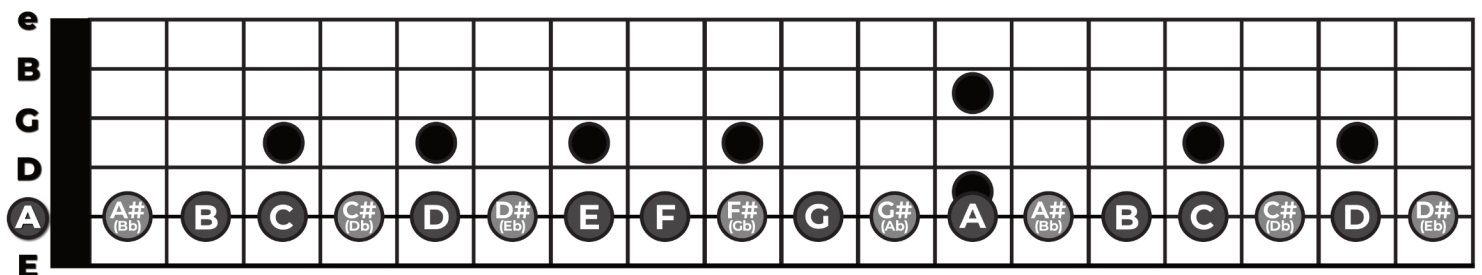

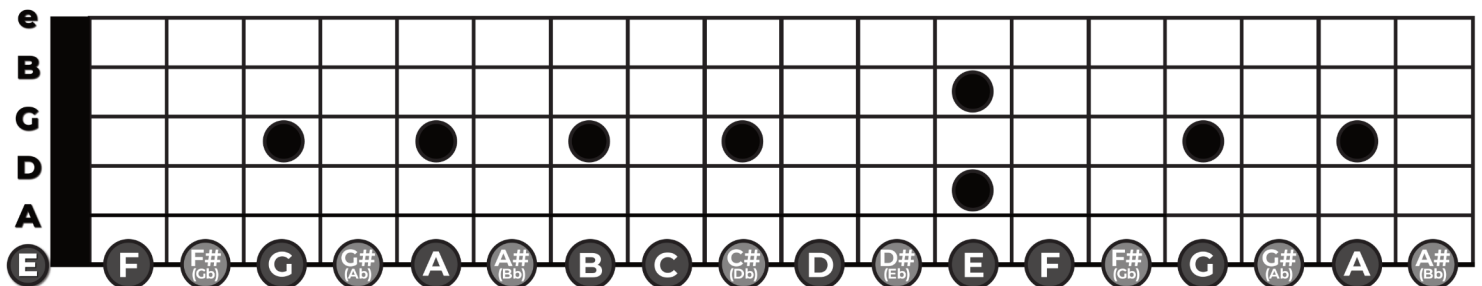

by Andrew Clarke

THE FIRST STEP:

Many guitarists believe they need to memorize every individual note on the fretboard. But this is not the case. Thanks to some incredibly handy systems, we really only **NEED** to learn the low E and A strings. You'll see why in a little bit.

As you memorize these two strings, I'd recommend prioritizing the notes that lie on the fret markers (or dots.) This gives you quick and obvious reference points that you can count up or down from to find the names of the other notes nearby.

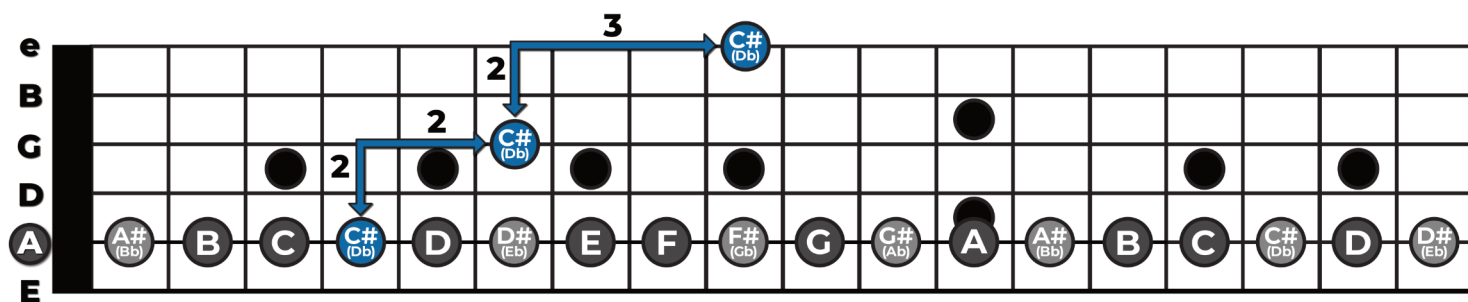

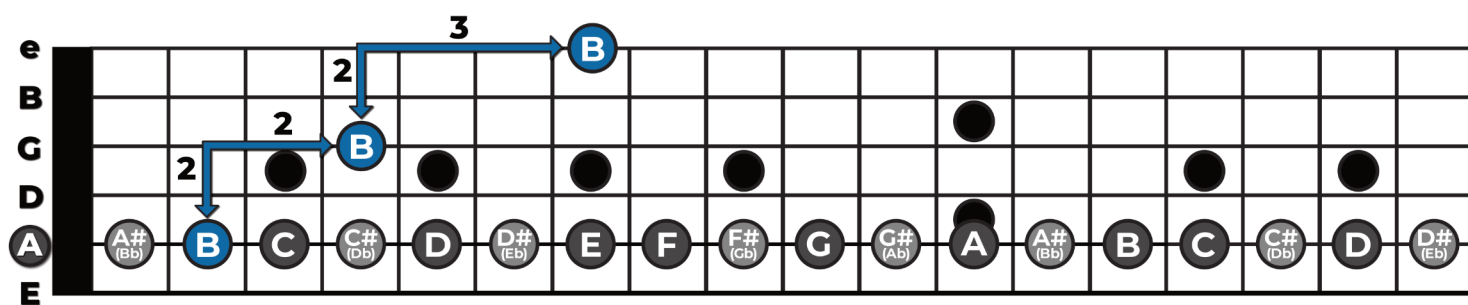

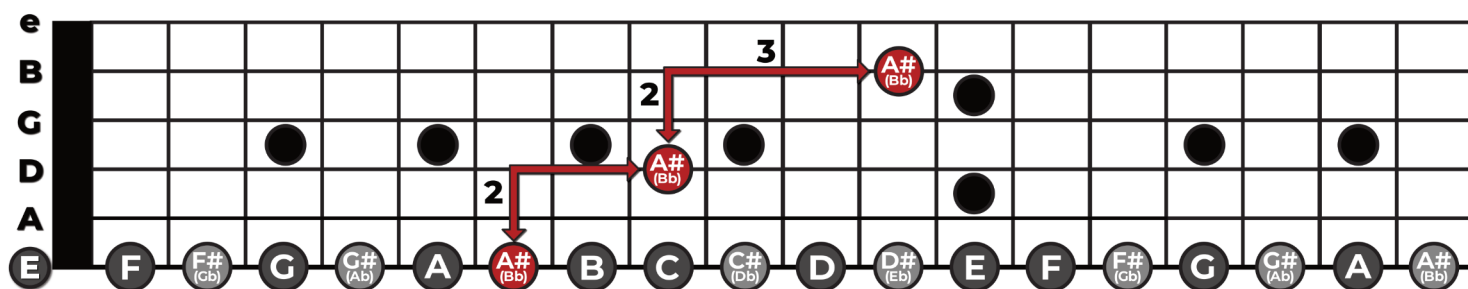

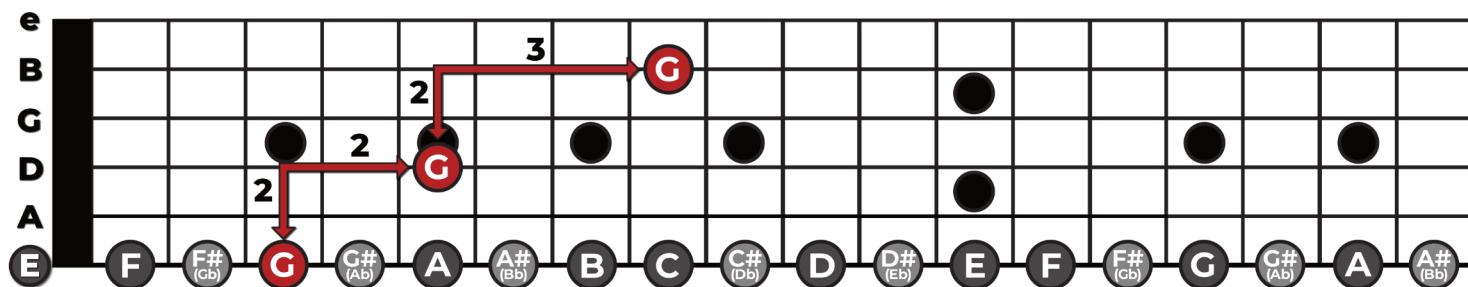

NOTES ON THE LOW E & A STRINGS:

OCTAVE CENTERS:

Since you now know the note names on the low E and A strings, you can use "octave centers" to find notes of the same name on the other strings.

Use the following shapes starting from any note on the low E or A string.

THE CAGED SYSTEM:

The CAGED system is a fretboard navigation system that breaks everything up into FIVE different chord shapes: The C shape, A shape, G shape, E shape, and D shape.

Nearly every chord you'll ever learn is based on one of these five shapes. And it's important to note that there are both major and minor variations of each shape.

For the purposes of this guidebook, we will be using two different approaches to the system: The VERTICAL CAGED system and the HORIZONTAL CAGED system.

THE VERTICAL CAGED SYSTEM:

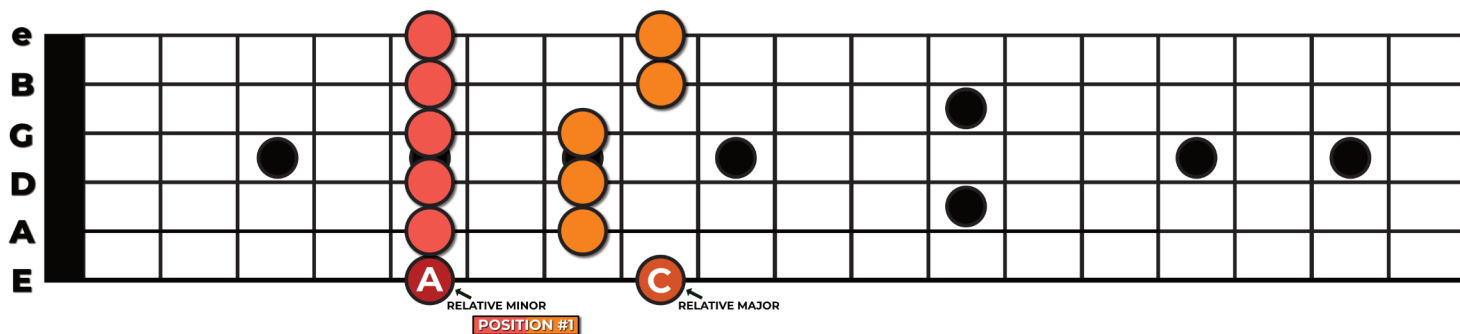

ALL THE CHORDS, ONE POSITION

CHORDS IN THE KEY OF C MAJOR:

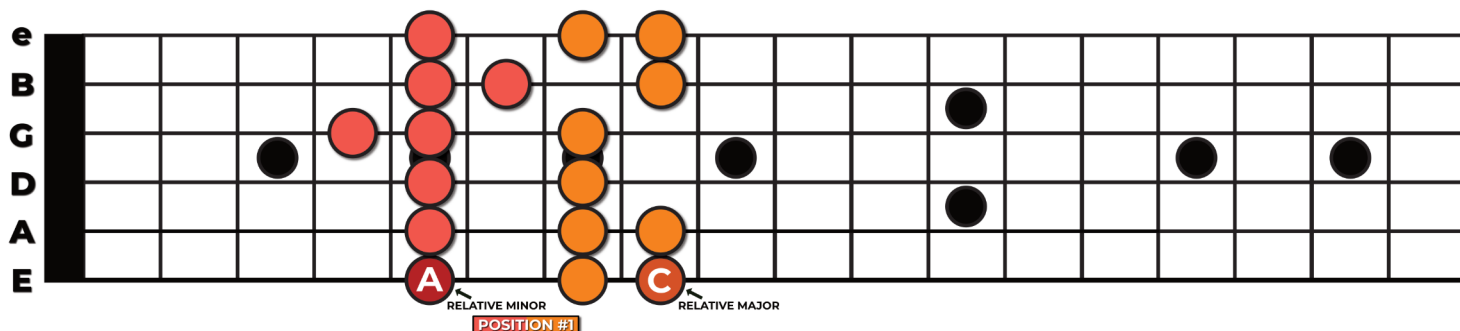

C	Dⁱⁱ	Eⁱⁱⁱ	F^{IV}	G^V	A^{vi}	B^{vii°}
Major	Minor	Minor	Major	Major	Minor	Dim

POSITION #1:

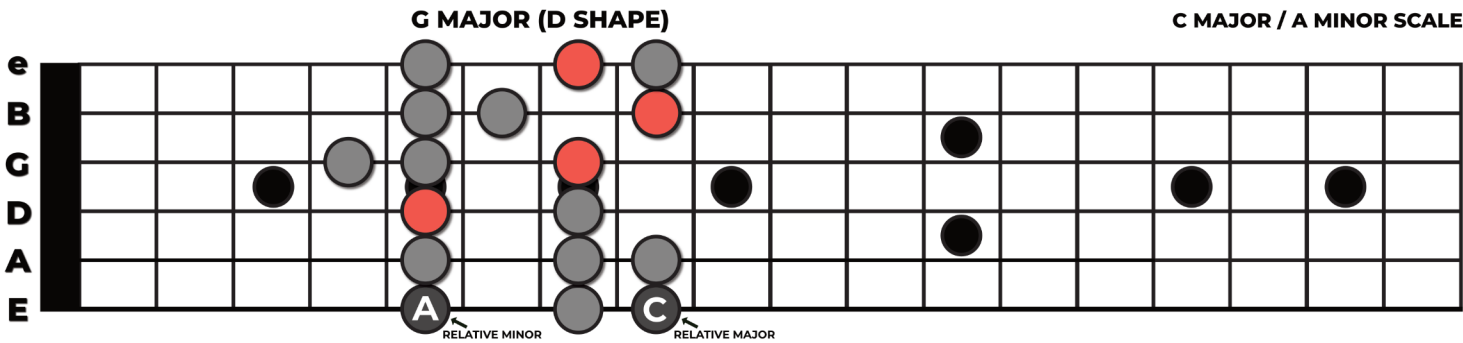

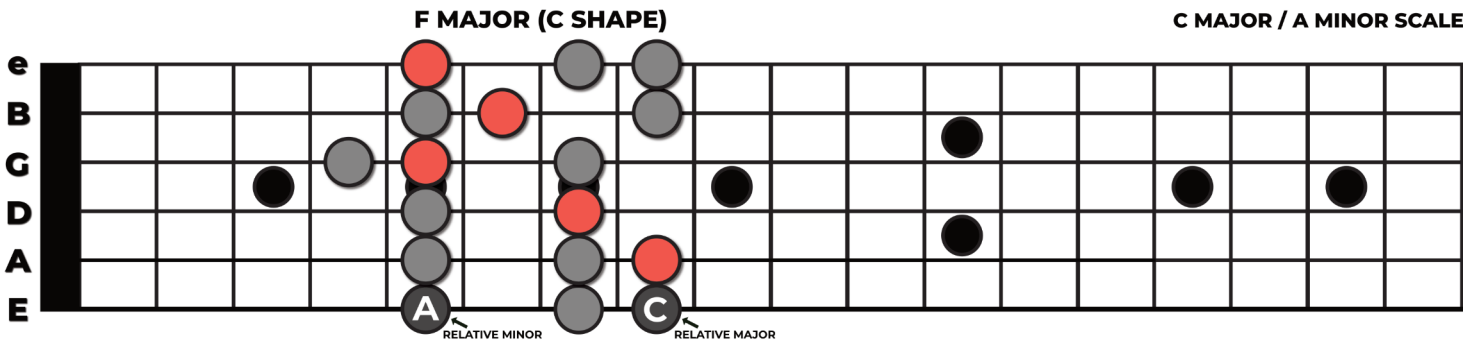

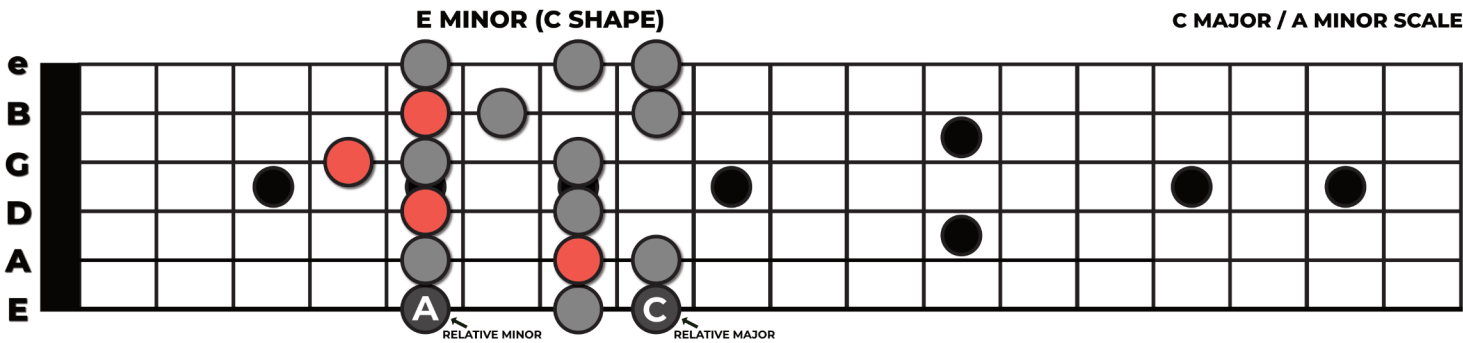

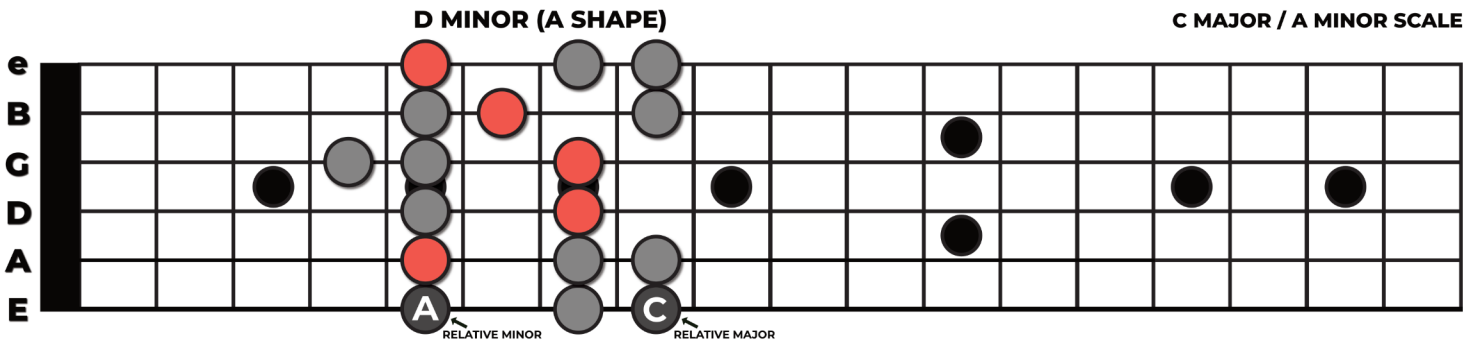

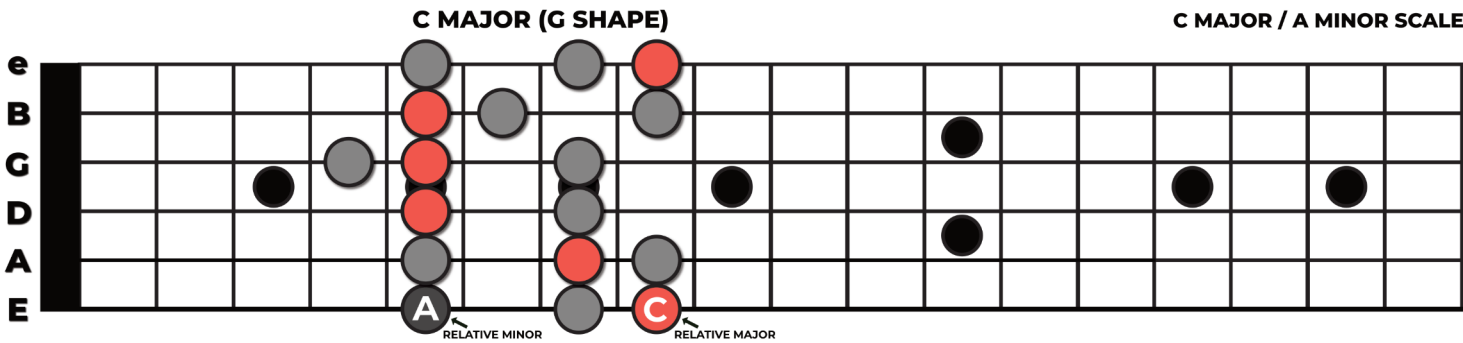

C MAJOR / A MINOR PENTATONIC SCALE

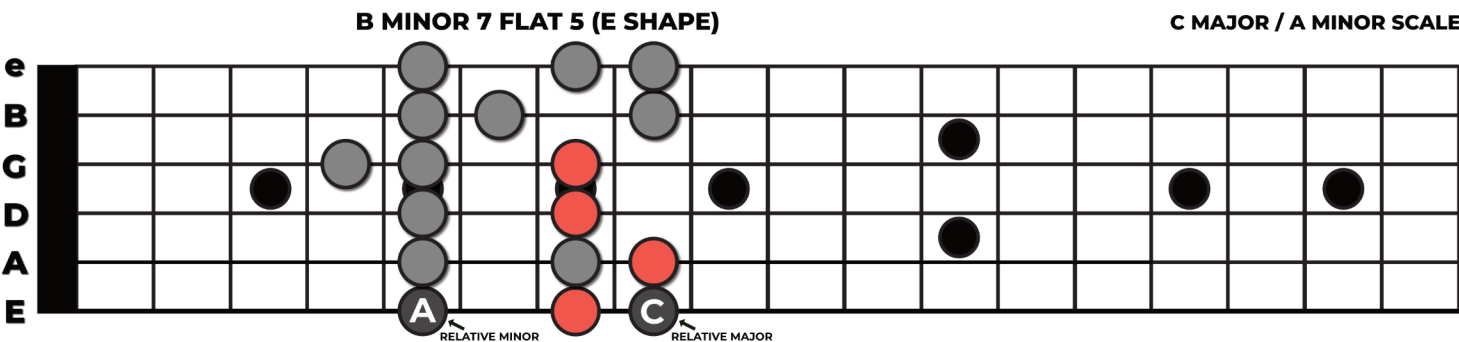

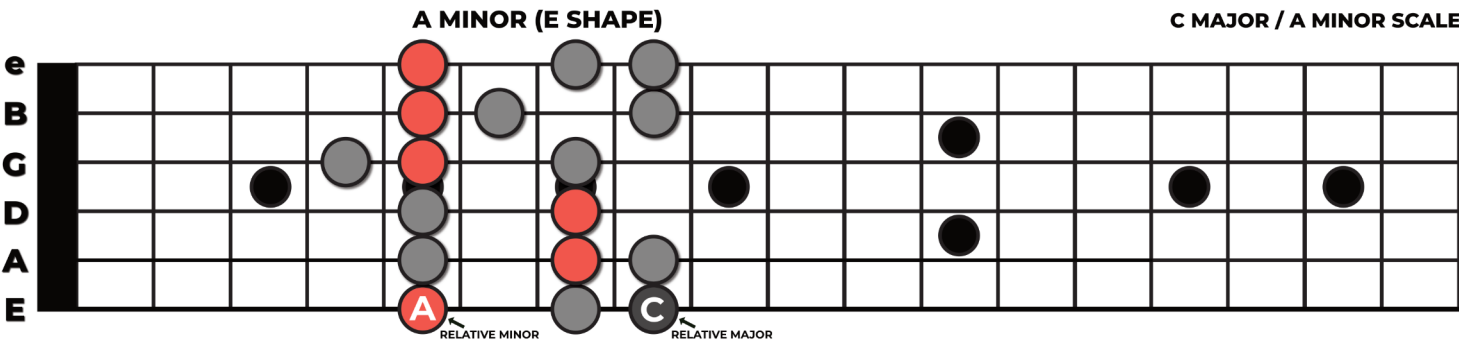

C MAJOR / A MINOR SCALE

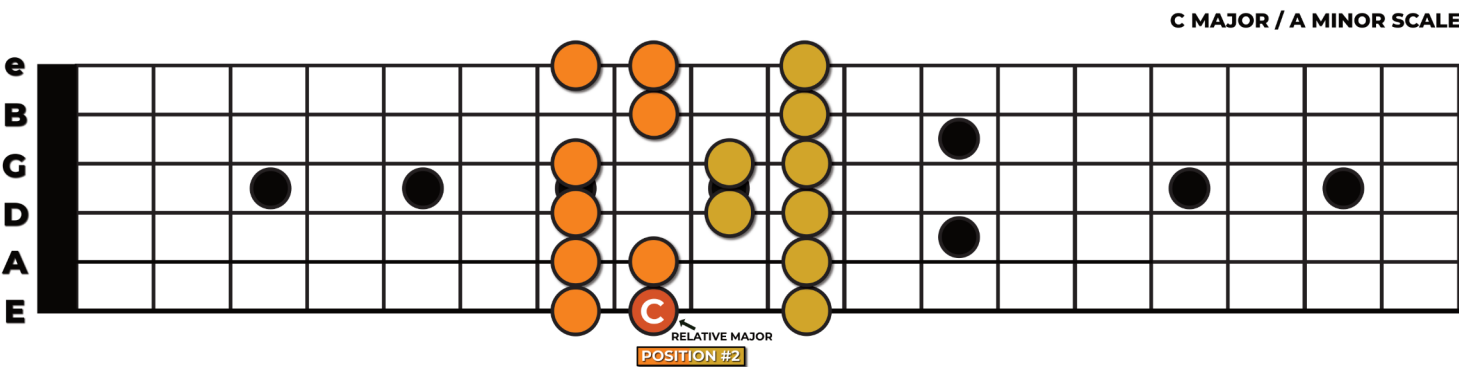

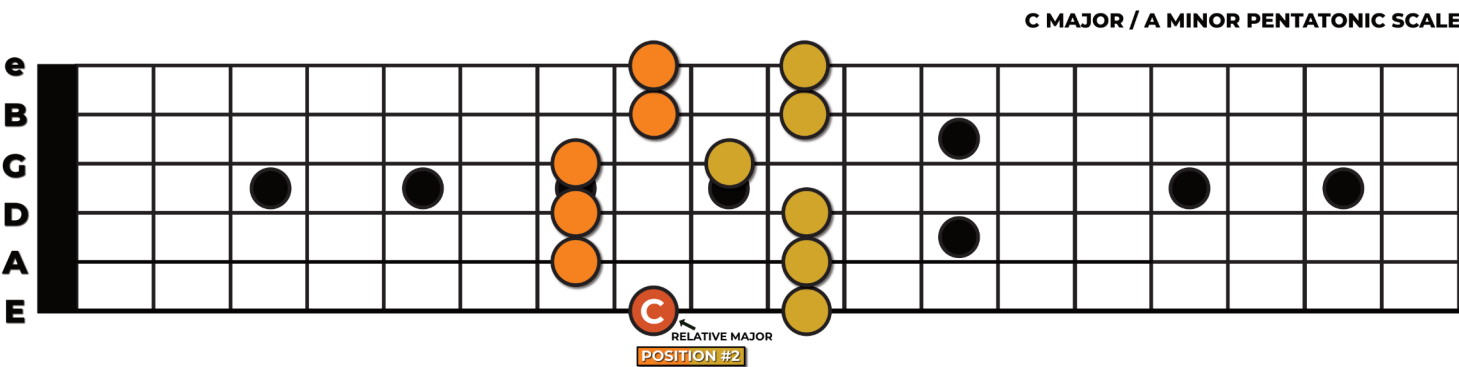

POSITION #1 (CONT'D):

POSITION #1 (CONT'D):

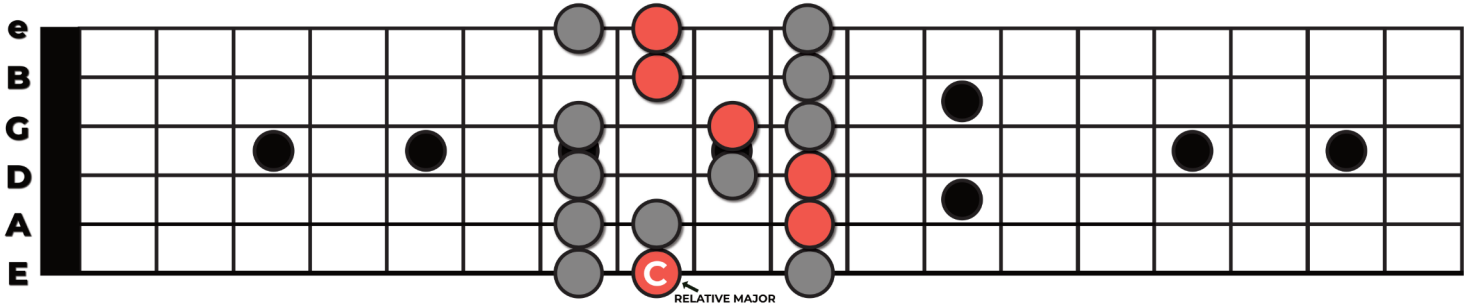

POSITION #2:

POSITION #2 (CONT'D):

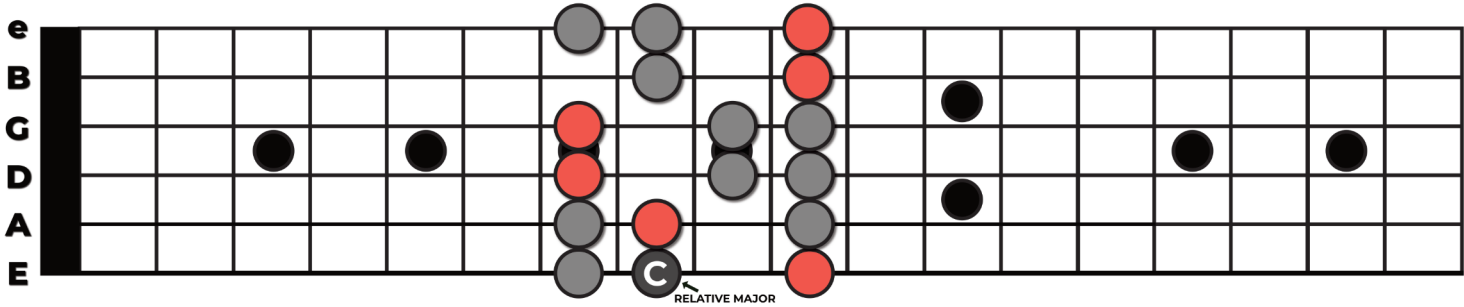

C MAJOR (E SHAPE)

C MAJOR / A MINOR SCALE

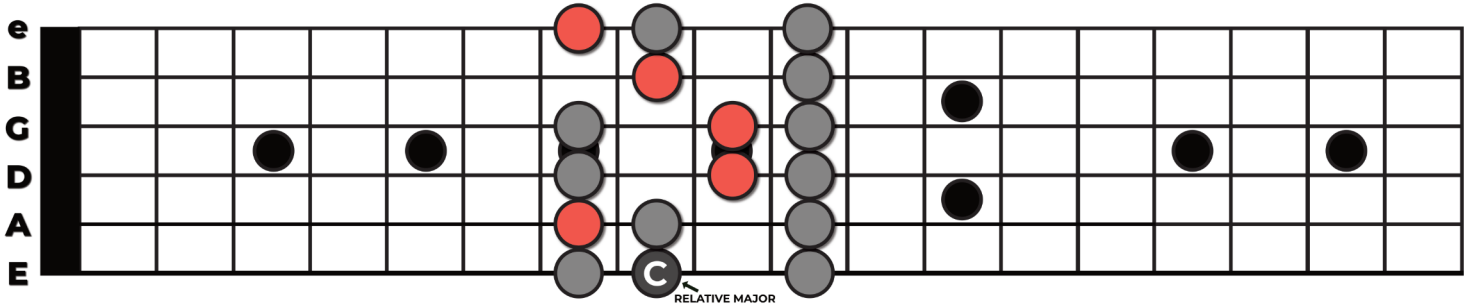

D MINOR (G SHAPE)

C MAJOR / A MINOR SCALE

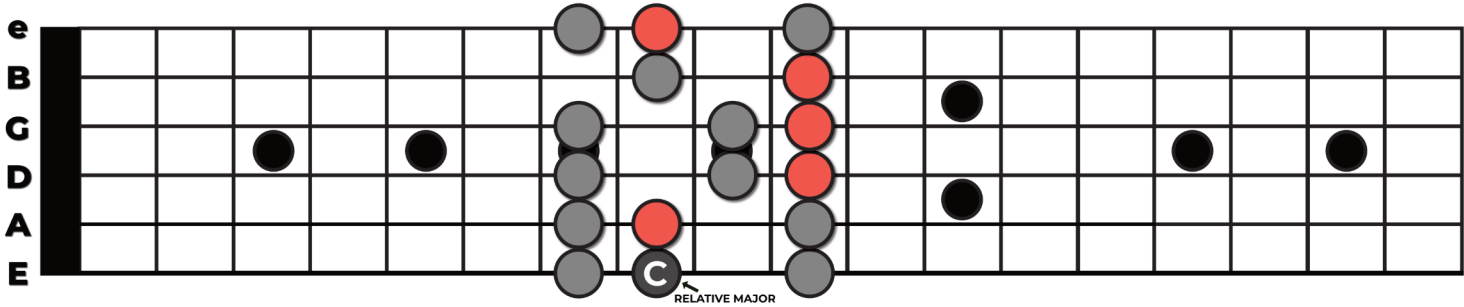

E MINOR (A SHAPE)

C MAJOR / A MINOR SCALE

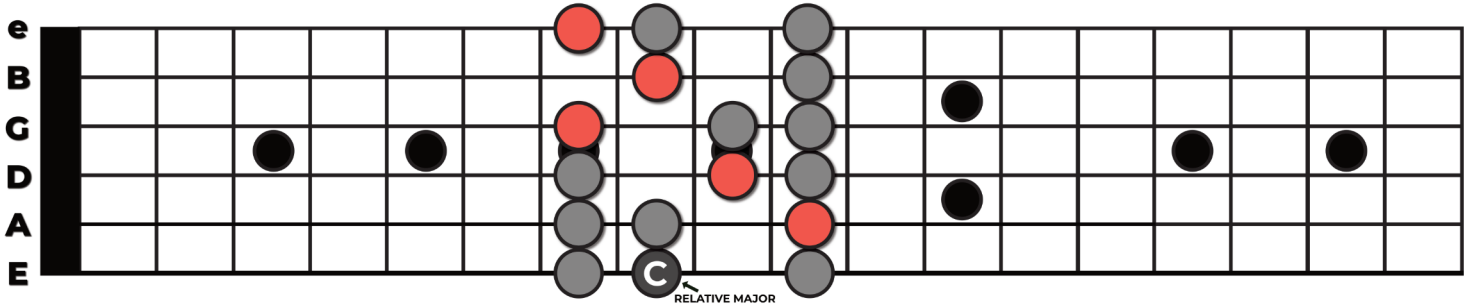

F MAJOR (A SHAPE)

C MAJOR / A MINOR SCALE

G MAJOR (C SHAPE)

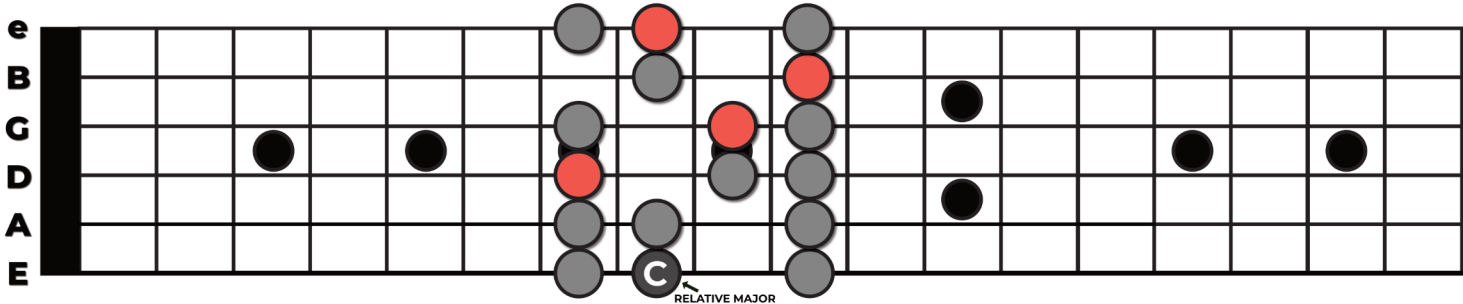

C MAJOR / A MINOR SCALE

POSITION #2 (CONT'D):

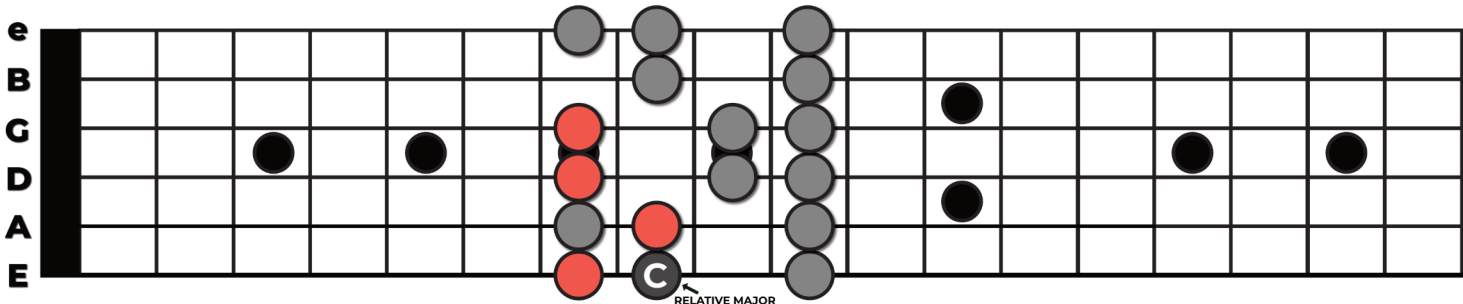

A MINOR (D SHAPE)

C MAJOR / A MINOR SCALE

B MINOR 7 FLAT 5 (E SHAPE)

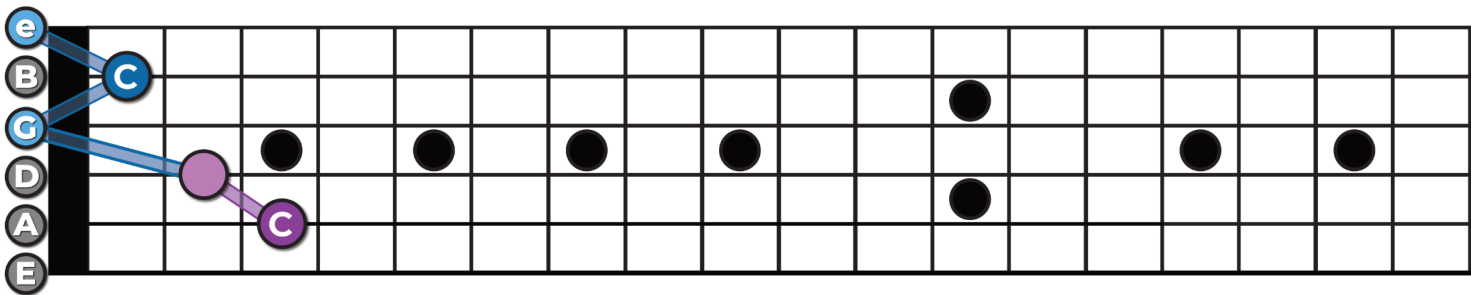

C MAJOR / A MINOR SCALE

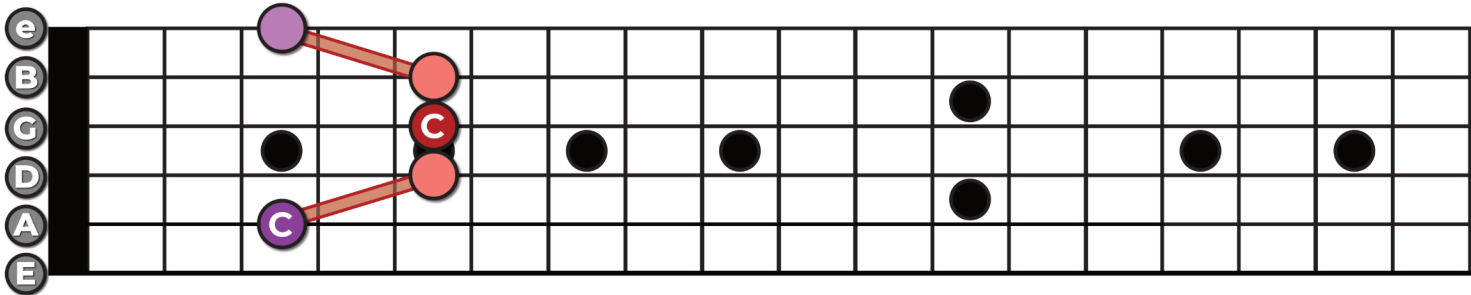

THE HORIZONTAL CAGED SYSTEM:

ONE CHORD, ALL THE POSITIONS

C MAJOR (C SHAPE)

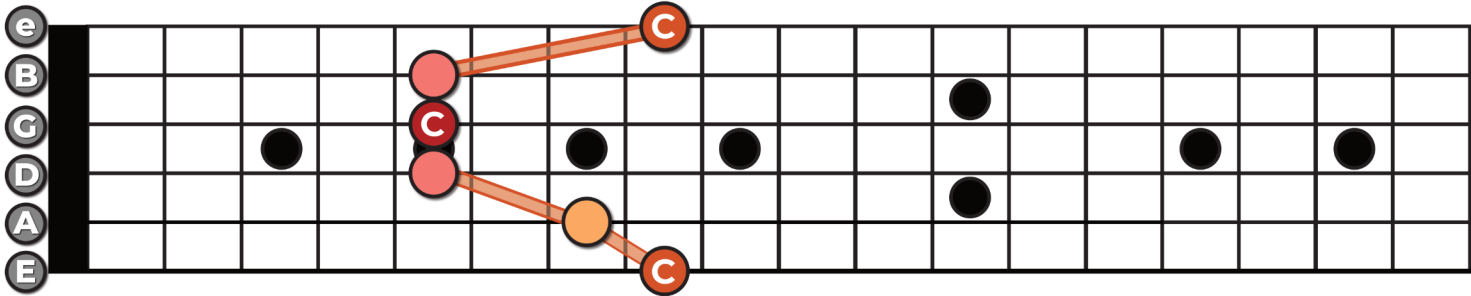

C MAJOR (A SHAPE)

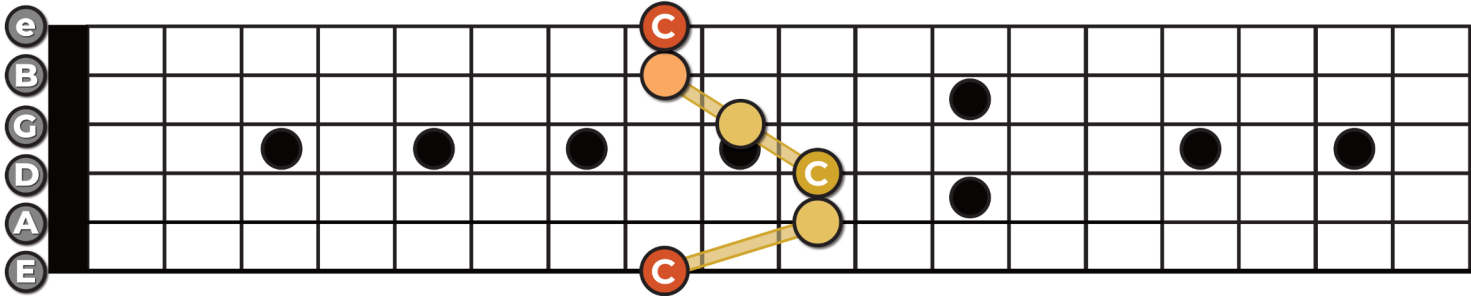

HORIZONTAL CAGED (CONT'D):

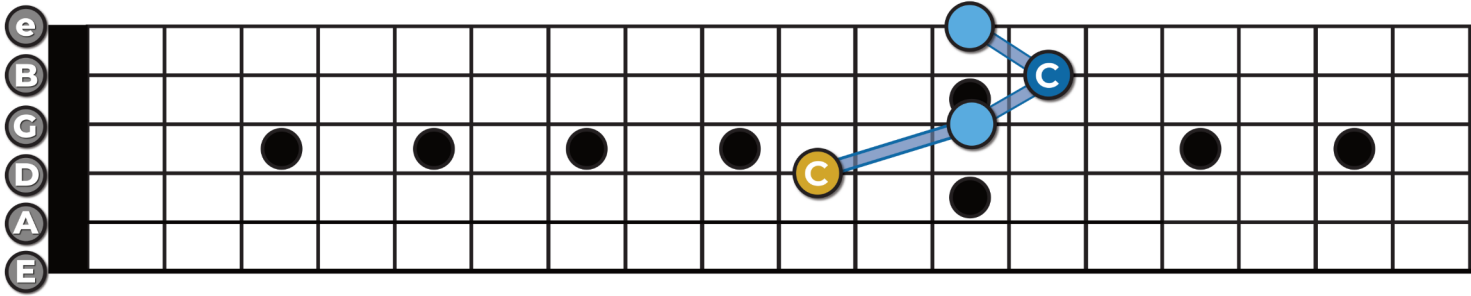

C MAJOR (G SHAPE)

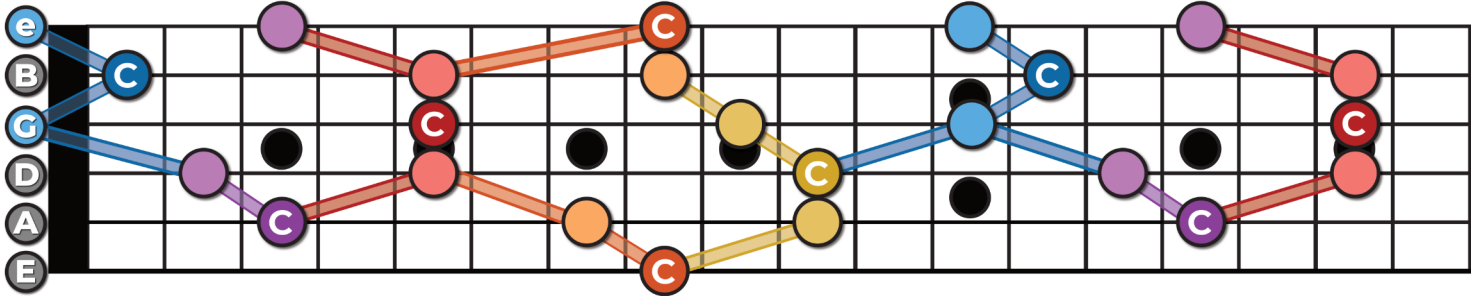

C MAJOR (E SHAPE)

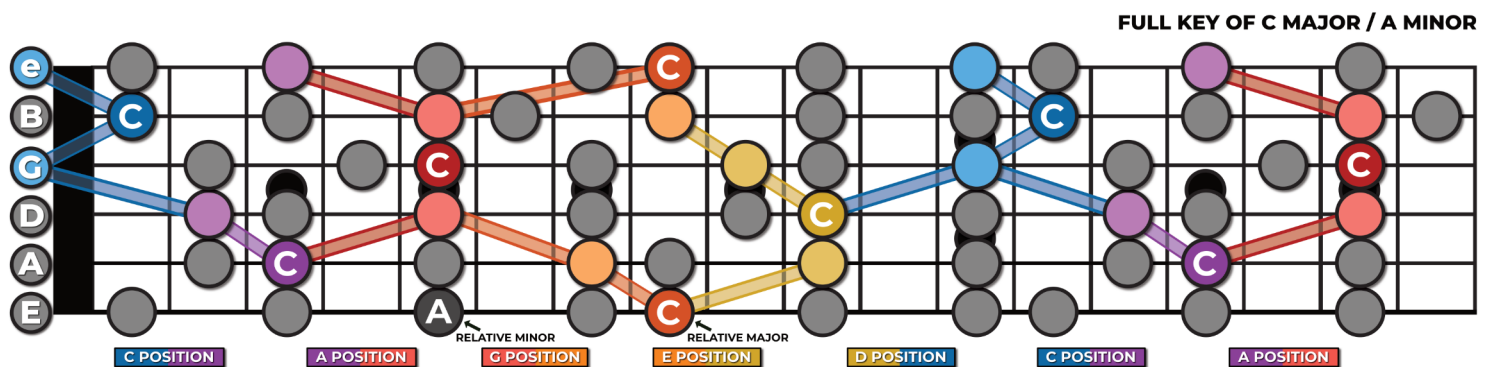

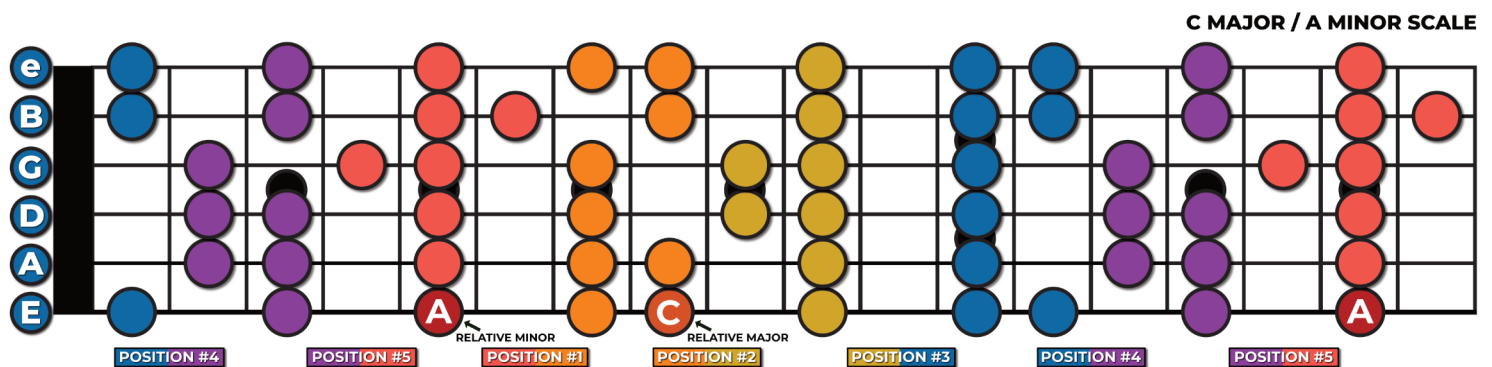

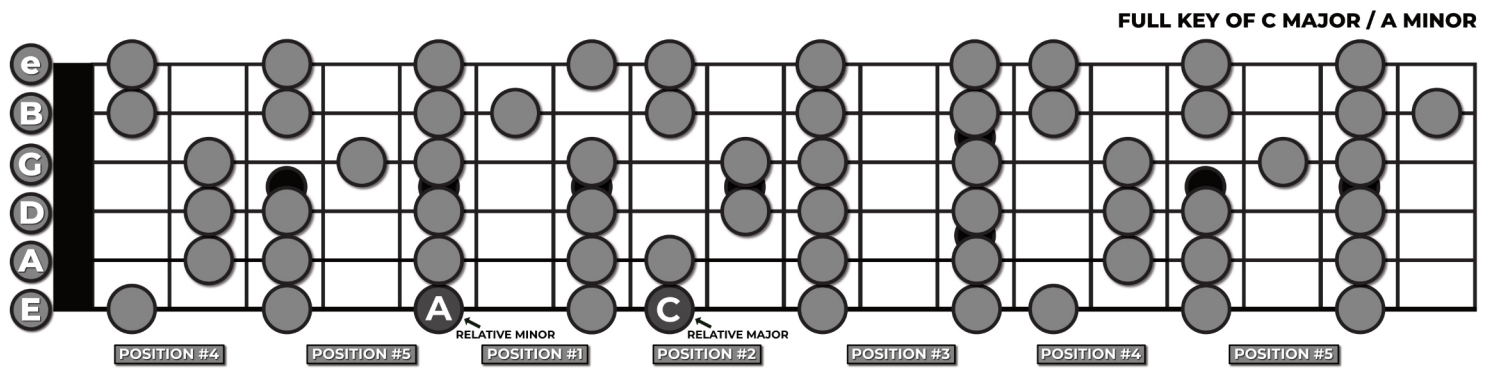

C MAJOR (D SHAPE)

FULL KEY OF C MAJOR / A MINOR

THE 5 POSITIONS + HORIZONTAL CAGED:

OTHER KEYS:

The amazing thing about all of these systems, is that they work the same in EVERY key. Just slide the shapes up or down the fretboard, and everything stays the same!

Let's look at the Horizontal CAGED system in two more common keys: D major and E major.

HORIZONTAL CAGED IN OTHER KEYS:
